

How to Create your Mini Coloring Book

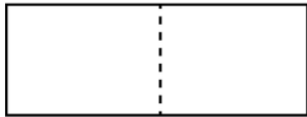

Fold in Half (Long Edge)

Fold your printed page in half lengthwise (hotdog style). Crease well, then unfold.

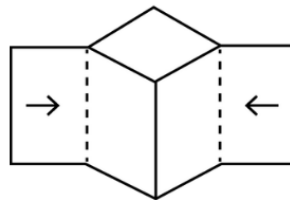

Cut the Center Line

Use scissors to cut along the center horizontal fold only between the two middle panels. Do not cut to the edges.

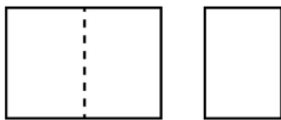

Fold in Half (Short Edge)

Fold the page in half the other way (hamburger style). Crease well.

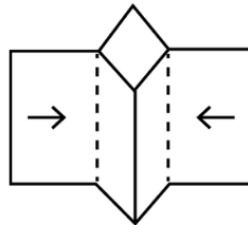

Fold in Half (Long Edge Again)

Fold the paper lengthwise so the cut line is along the top edge.

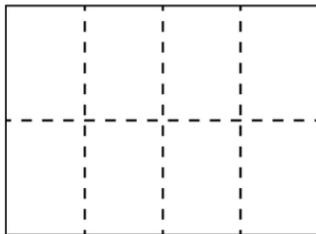

Fold Again (Short Edge)

Fold once more in the same direction to make a narrow rectangle.

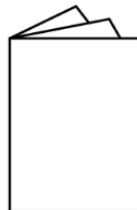

Push the Ends Together

Hold the paper at both ends and gently push toward the center - the slit will open into a diamond shape.

Unfold Completely

Open the paper back out - you should see 8 equal sections.

Fold into a Booklet

Keep pushing until the pages naturally fold into a small 8-page book. Flatten all edges neatly.
